

Safety Training

Personal Fall Protection Equipment Inspector

This course provides practical and theoretical knowledge for persons who are required to perform inspection of fall protection PPE in accordance with the Work at Height Regulations, PUWER, LOLER and BS8437.

Does not provide competence in servicing equipment, inspection of installed systems or use of PPE for work at height. Delegates do not require a work at height qualification to participate in this course, though an appreciation of the types of equipment being inspected will be advantageous.

Course Content

- ▼ Knowledge of the UK legislation and associated standards relating to the examination of personal fall protection equipment, including WAHR, PUWER, LOLER and BS8437.
- ▼ The role of CE marking and the EN standards scheme.
- ▼ Recognition of different defects in various items and how they may affect the safety of the item in use.
- ▼ The ability to undertake Thorough Examinations of PPE used for suspension which are subject to LOLER.
- ▼ The ability to implement an inspection regime for the examination and inspection of PFPE.
