

Safety Training

Lifting Accessory Inspector

This course provides practical and theoretical knowledge for persons who are required to perform inspections of lifting accessories in accordance with LOLER and BS 7121.

This is an intensive course involving practical training with some light manual handling activities.

Course Content

- ▼ Knowledge of the UK legislation and associated standards relating to the examination of lifting accessories, including LOLER/L113 and BS 7121.
- ▼ Recognition of different defects in various lifting accessories and how they may affect the safety of the item in use.
- ▼ The ability to undertake Thorough Examinations of lifting accessories and identify faults likely to impact on safety.
- ▼ The ability to implement an inspection regime for the examination and inspection of lifting accessories that includes reporting of serviceable and unserviceable items.

Prerequisites

- ▼ A basic knowledge of the lifting accessories being inspected and their capabilities.
